

14 years on the energy market!

April 11, 2019

On April 12, MKS Group of Companies turns 14 years old. This is quite an impressive period for an engineering company working in the complex, high-tech industry of small-scale distributed power generation. For 14 years, the company has gone from a small regional enterprise to an industrial corporation of federal importance - a recognized leader of the Russian small-scale power engineering market. Today MKS has more than 40 realized power projects with a total capacity of 201 MW, its own production of high-tech equipment, its representative offices in various regions of Russia and abroad. There are also ambitious plans, bold forecasts and a great desire to realize them.

Speaking about the main achievements with which the company approached its 14th anniversary, Maxim Zagornov, Director of the company, noted that the previous year was very productive for the MKS Group of Companies.

"We continue progressive development, we actively realize projects of own generation for 5 MW, we were the first in Russia to develop and make a block-module for 4.5 MW, having realized many innovative solutions, which no one has done before us, - Maxim Zagornov noted. - In general, we have accumulated a rich experience in realization of the most complex energy projects, which made MKS Group of Companies one of the five strongest engineering companies in Russia".

MKS Group is actively expanding the geography of its presence. In 2018, companies were opened in Nur-Sultan (Kazakhstan) and Dubai (UAE). A branch in St. Petersburg was launched. We acquired our own office in Moscow. At the same time, the Chelyabinsk division is also focused on the development and increase of production

capacities.

One of the main achievements of the past year was the confirmation of the status of a dealer and service partner of MWM Austria GmbH - the world's leading manufacturer of generating equipment. As Maxim Zagornov stated, MKS Group of Companies took the 1st place among dealers in Russia in terms of sales of this brand of equipment, once again proving the highest level of technical competence of the company.

"On behalf of the entire MWM Austria GmbH organization we would like to express our congratulations on 14 years of success of MKS Group of Companies in business. During this time you have achieved tremendous growth and have become an important and reliable partner for us. Your team always provides the best products and services to its customers", - noted the management of MWM Austria GmbH in its congratulatory message.

Today the MKS Group of Companies has occupied its stable niche in the sphere of small-scale distributed power generation in Russia, realizing turnkey power projects. The company has its own departments of design, service, production, and construction, which are staffed by high-class employees.

"It is in the formation of a team of professionals, perhaps, that the secret of our company's dynamic development lies," Maxim Zagornov emphasized. And noted that in the coming year the company will bet on increasing the number of employees, including in foreign branches.

Meanwhile, the MKS Group of Companies has not stopped its active participation in social and public life all the last year. The main image project of the company - the International Award "Small Power Engineering - Great Achievements", implemented jointly with the Association of Small Power Engineering, has reached the level of an authoritative international competition. The Company provided charitable assistance to the sponsored boarding school No. 9 in Chelyabinsk, the children's KVN team "Trump" and a Chelyabinsk girl, Katya Shundeev, who has cerebral palsy. On the eve of the birthday of MKS Group of Companies, Katya's family sent a message of congratulations:

We congratulate you on the Company Day!

We wish you successful projects, contracts!

Your energy is useful for everyone!

May there be victories, good luck, success!

With the mood for victory and success the whole team of MKS Group of Companies enters its 15th anniversary year. We are sure that all the main achievements are ahead of us.
