

MKC Group of companies becomes an authorized AKSA dealer.

January 26, 2023

MKC Group of companies has become an authorized [AKSA](#) dealer to represent interests of AKSA Power Generation, one of the global leaders in diesel power plants production, in Russia.

Founded in 1968, [AKSA Power Generation](#) produces diesel gensets at its own sites located in Istanbul, Turkey, and Changzhou, China. The authorized dealer title enables MKC Group of companies to solve the entire set of issues concerning sales, installation, commissioning and maintenance of AKSA equipment in Russia.

Today, diesel power plants manufactured by [AKSA Power Generation](#) are among the most efficient ones in the small power sector. To build power plants, the manufacturer uses the engines of the leading world companies - CUMMINS, DOOSAN, JOHN DEERE, MITSUBISHI, VOLVO PENTA, PERKINS as well as the generators of MECC ALTE, STAMFORD. The capacity range of power plants is 5-2,500 kVA. The entire range of products is covered by a quality certificate and have an obvious advantage over competitors' products in terms of an optimal price/quality ratio.

Competitive advantages of [AKSA](#) diesel generators are the following:

- extensive product line - [AKSA](#) Concern produces diesel generators with different types of switchboards and control panels. It is free to change the equipment design offering the best option to each customer;

- favourable prices - the concern offers [AKSA](#) energy equipment at a competitive price while reducing the total cost of diesel generators at the expense of the wholesale purchase of components and the reduction of the costs for delivery and space rental.
- maintenance service - MKC Group of Companies, AKSA authorized dealer, offers technical support services for the supplied power plants.

The qualified maintenance service includes preventive diagnosis of systems to enable solving problems at the initial stage, avoiding major breakdowns and repairs. Even though the main activity of MKC Group of Companies is the gas genset plants construction, the company is actively engaged in the implementation of diesel projects and commissioning diesel power plants in remote and isolated territories of the Far North and Siberia.

The competitive advantage of MKC Group of Companies is the implementation of the projects on a turnkey basis - from design and supply of reliable brands equipment to construction, commissioning and further maintenance of power stations.
