MKC Group of Companies will take part in the WETEX-2022 International Exhibition in Dubai

September 19, 2022

MKC Group of Companies will take part in the International Water, Energy, Technology and Environment Exhibition - WETEX-2022. The global exhibition event will be held on September 27-29 in Dubai and will bring together over 2,500 exhibitors from 55 countries.

The 24th International Water, Energy, Technology and Environment Exhibition WETEX is one of the most authoritative exhibitions uniting on one platform the participants in three key areas: energy, water technology, ecology. The exhibition is arranged by Dubai Electricity and Water Authority (DEWA), which plans to gather more than 2,500 exhibitors from 55 countries at WETEX site this year.

At WETEX-2022, MKC Group of Companies will present a single stand within the general Made in Russia exposition of the Russian Export Center. Within three days, a series of b2b talks with representatives of Emirati companies, participation in seminars and conferences, as well as a meeting with the DEWA management are scheduled.

MKC Group of Companies will present its integrated engineering solutions aimed at improving the energy efficiency of enterprises and reducing CO2 emissions: gas genset and hybrid power plants, mobile methanol and LNG production plants,

hydrogen plants and desalination units, energy storage systems, as well as floating power stations that provide fast power supply to the areas with limited infrastructure.

Within the framework of WETEX-2022, a range of agreements and memoranda of cooperation between MKC Group of Companies and the UAE business entities are expected to be signed.

Welcome to the stand of MKC Group of Companies at WETEX-2022:

- Dubai (UAE), Dubai World Trade Center (DWTC)
- Hall 2 (Solar, Sustainability, and Innovation pavilion)
- Made in Russia exposition,
- Stand 2E-12

For reference:

MKC Group of Companies is an engineering company, the main field of activities of which is the turnkey construction of power facilities. The company designs, constructs and operates gas genset power plants (mini-TPP). It is one of the leaders in the sphere of distributed power generation in the Russian Federation. The total volume of implemented energy projects is more than 350 MW.

Currently, the company is actively involved in the implementation of innovative green energy projects in Russia and abroad aimed at reducing the emissions of CO2: it constructs turnkey modular low-tonnage methanol and liquefied gas production plants, floating and hydrogen power stations, desalination units, and implements the projects on the introduction of energy storage systems as well. It belongs to the members of Business Russia, which is the largest business organization in the Russian Federation that unites high-tech companies in the non-commodity sector of the economy. Maksim Zagornov, the CEO of MKC Group of Companies, is a Business Ambassador of Business Russia to the UAE and he represents the interests of Russian business in the Emirati market.
