MKS Group of Companies joined the Chamber of Commerce and Industry of the Russian Federation

March 21, 2019

On March 21, 2019, an official ceremony was held in Moscow to mark the MKC Group of Companies joining the Chamber of Commerce and Industry of the Russian Federation. As noted by MKC Group of Companies Director Maksim Zagornov, this step will strengthen cross-industry partnerships, enhance the company's export activities, and, overall, mark a new stage in the company's development.

The Chamber of Commerce and Industry of the Russian Federation is currently one of the largest non-profit organizations uniting representatives of small and medium-sized businesses across the country. More than 52,000 enterprises operating in all sectors of the Russian economy are members of the CCI of Russia.

As noted by MKC Group of Companies Director Maksim Zagornov, the company's accession to the CCI of Russia was preceded by a series of audits of MKC Group of Companies. The company successfully demonstrated its strong technical and strategic potential. Over 14 years, it has accumulated unique experience in turnkey energy facility construction and has taken a leading position in the distributed power generation sector in Russia.

"Today, the MKC Group of Companies is a full-cycle engineering enterprise – we design, build, commission, and service mini-CHP plants. Over the past 14 years, we have built more than 45 facilities in various regions of Russia with a total capacity of 201 MW," said Maksim Zagornov. "The decision to admit our company to the Chamber of Commerce and Industry of the Russian Federation is a recognition of our professional competencies at the federal level."

By joining the CCI of Russia, the MKC Group of Companies will receive support in promoting investment and innovation projects, searching for investors and partners, including international ones, and will also have the opportunity to participate in evaluating legislative initiatives that affect business.

It is worth noting that MKC Group of Companies Director Maksim Zagornov has joined the Committee for Energy Strategy and Development of the Fuel and Energy Complex of the Chamber of Commerce and Industry of the Russian Federation.
